SEO | jQuery | UX | WCAG

➤ What I Do

Best practice HTML, CSS, JavaScript, & PHP
Design, build, & maintain efficient, reusable, & reliable code
Magento 1.x and 2.x (CE & EE) best practices & frameworks
Develop custom extensions & extend third party extensions
Full browser & device compatible frontend theming
Troubleshoot & debug issues across browsers / devices
Microdata, merchant feeds, WCAG audits & compliance
Optimization using best practice, on-page SEO
Front end speed optimization
3rd party API integration
Project planning, documentation & management

➤ How I work

Ensure the best possible performance, quality, and responsiveness of applications
Strong problem-solving skills through analysis
Quickly determine solutions to complex problems, and ensure tasks are thoroughly tested prior to production deployment
Maintain an upbeat attitude and a commitment to working as a team to solve problems
