HTML | CSS | JavaScript | PHP
Core Web Vitals | SEO | WCAG

What I Do

Best practice HTML, CSS, JavaScript, & PHP
Design, build, & maintain efficient, reusable, & reliable code
Magento 1.x and 2.x (CE & EE) best practices & coding standards
Develop custom modules & themes, extend 3rd party code
Collaborate with back-end devs, business, design, and marketing
Troubleshoot & debug issues across all browsers & devices
Accessibility (WCAG) audits & compliance updates
Code optimization using best practice, on-page SEO
SME for Magento front end experience, security, & performance
Project planning, estimations, documentation, & management

How I work

Ensure the best possible performance, quality, security, stability, and responsiveness of Magento (Adobe Commerce) application
Ensure code is thoroughly vetted and reviewed prior to production deployment to ensure coding and security standards
Maintain an upbeat attitude, despite difficult circumstances
Provide honest, responsive, and clear communication
Self-driven, with a commitment to team success
